## DIGITAL SYSTEMS ENGINEER

Bangkok, Thailand | +66 94 360 5725 |
primnatchaya2540@gmail.com
LINE: @pimgd

## PROFESSIONAL SUMMARY

Digital Systems Engineer with 7 years of experience in software development and industrial digital solutions. Currently develops AI-based product quality inspection systems, real-time CCTV monitoring, dashboards, and maintenance workflows. Experienced in C#, ASP.NET, Java, APIs, database design, and applying AI from solution design through deployment in factory operations. Also experienced in presenting and selling software solutions to healthcare and local government clients.

## TECHNICAL SKILLS

**Programming & technologies:** C#, Python, Java, Laravel, TypeScript (NestJS)
**Frameworks:** ASP.NET, PHP Laravel
**Databases:** SQL, Microsoft SQL Server
**Tools:** Visual Studio Code, Postman, Git, Microsoft Office, Photoshop, CiRA CORE
**Methods:** RESTful API design, unit testing, ERP system design, process and system diagrams

## SALES & CLIENT ENGAGEMENT EXPERIENCE

**Sales & Client Engagement | Pavara Prosperity** 2022 - 2025 (4 years)
- Presented and sold software solutions to Srinagarind Hospital, Faculty of Medicine, Khon Kaen University.
- Presented and sold software solutions to municipal and local government clients in Khon Kaen.
- Sold cleaning chemical products, including product presentation and customer communication.

## PROFESSIONAL EXPERIENCE

**Digital Systems Engineer | Boonrawd Brewery Co., Ltd.** Jul 2026 – Present
Samsen, Bangkok, Thailand
- Develop AI vision systems to inspect bottles, cartons, and other packaged products in the factory, supporting consistent product quality.
- Coordinate with suppliers on a face recognition solution for employee access to production lines.
- Build real-time CCTV monitoring that sends LINE alerts when cameras go offline, with dashboards and repair job workflows for system administrators.

**Full Stack Developer | KKF Thailand** Mar 2020 – Jul 2026
Industrial Technology Department | Khon Kaen, Thailand
- Gathered and analyzed user requirements, then designed technical solutions for factory operations.
- Designed production planning and ERP systems; used production meter data for real-time dashboards, production planning, and work orders.
- Developed web applications and database integrations with C# and .NET to improve manufacturing processes.
- Delivered digital solutions to reduce manual work and production waste; applied AI to improve automation and data analysis.
- Created process maps and system diagrams, and tested and debugged software to support reliable delivery.

**GMD Department Intern | TT Network Integration (Thailand) Co., Ltd.** Sep 2019 – Mar 2020
- Provided technical support and resolved issues in internal applications for Toyota and affiliated companies.
- Investigated errors, identified causes, and coordinated with development teams on complex issues.

## SELECTED PROJECTS

**AI Vision for Manufacturing Quality Inspection** Mar 2020 – Jul 2026

- Collected and prepared image datasets, trained machine learning models, and developed real-time computer vision inspection to detect product defects on production lines.
- Connected AI inspection to manufacturing workflows to automate checks, reduce manual inspection and waste, and improve product quality.

**Machine Data Monitoring and Analytics** Mar 2020 – Jul 2026

- Designed databases and web tools to track machine performance and key indicators in real time and support historical analysis.
- Improved database structures for larger data volumes, supporting preventive maintenance and reduced machine downtime.

**CCTV Monitoring and Maintenance Workflow** 2026 – Present

- Designed a real-time monitoring dashboard and LINE alert workflow for camera downtime, including repair job creation and status tracking.

**Factory ERP and Procurement Systems**

- Developed ERP workflows for production orders, production planning, quotations, procurement, and repair orders, including a real-time dashboard and procurement web pages for a Khon Kaen textile factory.

**AI Chatbot for Srinagarind Hospital**

- Developed a toxicology information website and AI chatbot for Srinagarind Hospital, Faculty of Medicine, Khon Kaen University, with front-end and back-end support for healthcare staff.

## EDUCATION

**Bachelor of Science in Computer Science**
Khon Kaen University | Khon Kaen, Thailand
Graduated in 2020

## ADDITIONAL INFORMATION

- Valid driver's license; able to travel for work outside the home province.
- Expected salary: THB 35,000–38,000.
